#### Slew Safe™

Exclusive to the TIDD Crane, Slew Safe™ can eliminate pick and carry crane rollovers, which are costly to operations and often people! This simple and effective system restricts the driver from operating off the chart. With audible and visual alarms along with steering restrictions, Slew Safe™ can't be over-ridden but will operate again when the load is back in the green. This sets a new standard in safety and industry best practice!

Patent Pending: 741038
